

# AN Ammonium Nitrate

## Affordable N stability

### Product description

Ammonium nitrate is a high-efficiency, concentrated nitrogen fertilizer for the top-dressing of winter crops, perennial grasses and pastures, as well as for sugar cane cultivation.

It also has industrial uses, where it is mainly used in the production of explosive substances and mixtures. Produced in prill form (small pellets), AN is treated with anti-caking additives to enhance transportation and storage characteristics.

### Technical data

Total nitrogen (N), min including nitrate	34.4%
including ammonium	17.2%
Granulometry	
1 to 4 mm, min	95%
less than 1 mm	5%
Static strength of granules, N/granule (kgs/granule), min	8.0 (0.8)
